

Expense Description	Estimated Cost
Rain garden plants	\$1600.00
Wildflower meadow seeds	\$900.00
Fruit trees/orchard materials	\$1000.00
Shrubs on rain garden buffer	\$900.00
Tools/Random supplies (books, black plastic, straw, etc.)	\$2,000.00
Totals	\$6,400.00

I added that \$400 because we can always use more tools. The price for the tools is really just an estimate. We could probably spend \$4,000 if we had it. Right now our tools are from peoples' houses and a lot of kids' parents won't let them bring any tools in.

The shrub for the rain garden buffer price is not a fixed price because \$900 will not allow us to vegetate the whole bank. It would give us a good starting project, but would not allow us to vegetate the whole bank surrounding the rain garden.
