### Statement

The Green Artists League (GAL) is an interdisciplinary collective of artists who have come together to create public art that addresses the global environmental crisis. The Green Artists League is both an art-making collaborative and a forum for contemporary artists to explore the relationship of art and ethics in an era of ecological degradation. GAL strives to be a model of community, collaboration, and service. Viewing art as an agent for transformation, GAL engages the public through interactive art experiences. It is GAL's hope that by engaging the public as co-creators in our work we will raise environmental awareness and empower people to adopt environmentally sustainable behaviors and attitudes.

B.F.A. 1992 Photography, University of New Hampshire, Dover, NH

Tim explores the role of artist as cultural instigator, asking questions that raise issues and challenge assumptions about our relationship to nature. His work combines humor and irony as artistic tools, with photography, video, new media, graphics and sculpture, to provoke public consciousness and advocate awareness of eco-issues. Awards including the Artist Advancement Fellowship from the NH Charitable Foundation, Fellowships from the MacDowell Colony and NH State Council on the Arts, and commissions from the city of Portsmouth, have given him the opportunity to create public art projects that have stimulated collaboration, interaction, and have challenged conventional thinking.

After many years of teaching at the University of Iowa and exhibiting as an abstract painter, Erin left the art world. She pursued her psychology degree and worked in addictions counseling, and creativity training. Moved by her spiritual practice in Zen and Christian communities, Erin became increasingly involved in environmental activism and cultivating ethical and creative community. In 2006, Erin founded the Green Artists League.
